

# International Master in Biomedical Sciences

- A joint multicultural program between Universidad de Buenos Aires in Argentina and Universität of Freiburg in Germany.
- We train scientists in practical Biomedicine with the focus of translational medicine (from the bench to bed).
- It has been a successful Master's program taught entirely in English since 2008.
- Since 2019 it has become a binational degree, granting its graduates two master's degrees.
- Topics: *Scientific Communication, Training in Interculturality, Good Scientific Practices, Intensive Courses of Spanish and German, Biophysics, Bioenergetics Biochemistry and Molecular Biology, Physiology, Cellular and Molecular Immunology, Pharmacology and Toxicology, Virology and Microbiology, Neurobiology, Cardiology, Pathology, Clinical Medicine, Molecular Oncology, Biostatistics and Experimental Models, Research practice in the laboratory.*
- Mentorship, continuous evaluation, master thesis in research groups, meetings with program coordinator.

**143 Master graduates from 29 countries**

**25% are employed in industry, academia or public health system**

**75% pursue a PhD in Germany, Argentina or elsewhere.**
