Course Description:  
This course introduces students to the political institutions and issues in Western Europe. Using broad concepts in political science and a comparative analytical framework, the course will explore the historical, institutional and cultural context within which current political and economic dynamics are playing out across (Western) Europe. This course is organized thematically. It will introduce students to major historical events crucial to the formation of modern European states. It will then examine the institutions, parties and political processes that affect political behavior in representative European democracies. The course will explore the European Union’s development by addressing four main dimensions: its historical development, its political evolution, institutional framework, and its main public policies. Finally, it will explore recent and developing political crises in Europe including the Euro debt crisis, Brexit, migration, terrorism in Europe and the impact of the COVID-19.

Once you begin to take the exam, try to complete and submit within the given time frame. If you leave the quiz suspended for too long after you start it, your Internet service provider may think you are inactive and automatically log you out. If that happens you will not be able to retake it until the instructor resets it. Also, do NOT have additional windows open while taking any assessment.
