ARH 4520 – African Art

Instructor: Noelle Theard
ntheard@fiu.edu

This course provides a survey of African visual art from the traditional arts of Africa to the contemporary African art movements that are currently energizing global art markets and academic discourses. Students will engage history and aesthetics to comprehend the role that African art has played in both traditional and contemporary African societies. The course will also contextualize the importance of African art on a global scale. Lectures, readings, films, and images explore the breadth of African visual arts. Students will understand the role that African art has played in traditional, colonial, post-colonial and contemporary contexts, and they will understand how historical and geopolitical events have affected African visual arts.

Students will begin by interrogating their own notions of Africa and will be able to analyze the ways in which Africa has been constructed in the popular imagination. Through the study of African history and geography, students will gain a foundational knowledge of the continent and the many countries that comprise it, as well as the role and function of art in traditional African societies. Moving forward, students will study the impacts of colonialism on the African continent, reading both art historical and anthropological texts to deepen their understanding of colonialism’s effects on African art. Students will explore issues such as concepts of authenticity, the art/artifact debates, and modernism’s appropriation of African art. Particular emphasis will be placed on postcolonial realities in Africa as a result of African independence movements and their effects on African visual arts. The course then incorporates African visual arts in the diaspora, and finishes the semester examining contemporary African visual artists.

Readings available on the course site, unless listed as part of the three required texts:
